<b>1</b>		<b>3</b>
1.1	.....	3
1.2	.....	3

# 1

Factor the following completely.

## 1.1

$$16x^4 - 1$$

$\Rightarrow (4x^2 - 1)(4x^2 + 1)$	Factor using difference of two squares.
$\Rightarrow (2x - 1)(2x + 1)(4x^2 + 1)$	Factor using difference of two squares. ■

## 1.2

$$8j^3 - 125k^6$$

$\Rightarrow (2j - 5k^2)(4j^2 + 10jk^2 + 25k^4)$	Factor using difference of two cubes. ■
